## The 7 Most Endangered Programme

14 monuments and sites shortlisted for 'The 7 Most Endangered' Programme

### Gaslight and Gas Lamps in Berlin, GERMANY

These romantic, historically valuable and perfectly functioning gas street lights have been part of Berlin's cityscape for almost 200 years. Today no other city in the world has preserved gas lights to such a scale which confers to the streets of Berlin their unique character. The proposed replacement of gas lights with electrical lamps is opposed by the local community and numerous tourists who are strongly attached to the existing gas lamps.

Photographer: Bertold Kujath – Gaslicht-Kultur e.V.
